

Strategic synergies with related European projects in seismology: the ERC projects WHISPER, WAVETOMO; the ITN project QUEST; the research infrastructures projects NERA, SHARE, REAKT.

Through **KNMI-ORFEUS & EMSC**—the 2 seismological European NPOs in seismology like **IRIS, Earthscope** in the US; **JAMSTEC and NIED** in Japan.

With European multi-disciplinary infrastructure projects such as EUDAT and ENVRI, and with the European data and computing infrastructures: EGI and PRACE.

Through **EPOS**, VERCE is involved in bilateral collaborations with the US National Science Foundation through the new COPEUS and i-CORDI initiatives.
